

ABOUT

14 years of experience building and shipping iOS products with Swift, SwiftUI, and UIKit. Shipped **20+ apps**, including a product with **250k installs** and **10k DAU**. Led mobile development for a service with **7.5k active subscriptions**, increased subscription conversion by **25%**, cut cold launch time by **50%**, and made releases **12x faster**.

I take products from requirements to release, building reusable UI component systems and UX-focused features that follow Apple's guidelines. I work independently or in cross-functional Scrum and Kanban teams, turning discussions with product owners into structured technical tasks and backlogs while mentoring junior developers. My broader experience includes SwiftUI migrations, performance and crash-free rate improvements, TDD and automated testing, CI/CD and release automation, plus basic Figma design and mobile DevOps work when needed.

SKILLS

iOS: Swift, SwiftUI, UIKit, Swift Concurrency, async/await, Combine, GCD, Core Data, SwiftData, WidgetKit, PhotosUI, AVFoundation, PDFKit, Core Animation, Core Graphics, Objective-C

Architecture: Clean Architecture, MVVM, VIPER, MVP, MVC, SOLID, modular architecture, dependency injection, reactive programming, declarative UI

Networking and data: REST API, OpenAPI, OAuth, background downloads, local storage

Quality and observability: Swift Testing, XCTest, XCUITest, UI testing, performance testing, code coverage, Sentry, Firebase Crashlytics, PostHog

Delivery: Xcode, Git, SPM, CocoaPods, Fastlane, Codemagic, GitHub Actions, CI/CD, code signing, TestFlight, App Store Connect, Google Play

Product: subscriptions, RevenueCat, paywalls, A/B testing, analytics, feature flags, localization, deep links, push notifications, audio streaming

AI-assisted engineering: LLMs, Codex, Claude Code, Cursor, OpenRouter, coding agents

EXPERIENCE

LISTENING: 05/2023 - 07/2026, 3+ YEARS

- Built and scaled the mobile product to **7.5k active subscriptions** and a peak MRR of **\$100k**.
- Increased conversion by **25%** through A/B tests of pricing, trial periods, and onboarding.
- Reduced cold launch time by **50%** and time to first audio playback from **3 seconds to 150 milliseconds**.
- Doubled background download speed and reduced network traffic by **35%** through local caching.

Stack: Swift, RevenueCat, Firebase, PostHog, Sentry, OpenAPI, Codemagic, Fastlane, Flutter.

VONAGE: 03/2022 - 05/2023, 1+ YEAR

- Designed a modular app architecture **to accelerate feature development**, reducing implementation time for new user flows by **30%**.
- Optimized data loading, pagination, and rendering **to keep large collections responsive**, enabling **1,000+ cards** to open in under **300 ms** with smooth scrolling and card flipping.
- Built a unit-test suite **to protect core business logic from regressions**, reaching **65% test coverage** and making product changes safer.
- Automated builds, code signing, and publishing with Codemagic and Fastlane, reducing release preparation from **2 hours to 15 minutes**.

Stack: Swift, UIKit, RevenueCat, OAuth, Dio, Hive, Codemagic, Fastlane, Flutter.

MYTHIA: 09/2018 - 03/2022, 3.5 YEARS

- Built **20+ banking and debit-card flows** to launch Mythia's fintech product for real customers, covering onboarding, verification, accounts, transactions, deposits, withdrawals, statements, rewards, and push notifications.
- Diagnosed and fixed production crashes **to improve app stability**, increasing the crash-free user rate from **83.8%** to **98.8%**.
- Localized the app into **8 languages** to support international users and reduced the time required to add a new language from **2 weeks to 1 day**.

Stack: Swift, UIKit, Core Data, Combine, Alamofire, Plaid, PostHog, Sentry, Fastlane, GitHub Actions.

UPWORK: 03/2016 - 09/2018, 2.5 YEARS

2GIS: 08/2015 - 08/2016, 1 YEAR

FLATSTACK: 04/2013 - 08/2015, 2+ YEARS

EDUCATION

KAZAN NATIONAL RESEARCH TECHNICAL UNIVERSITY NAMED AFTER A. N. TUPOLEV - SPECIALIST, 2007 - 2012
Computer Science and Computer Engineering

KAZAN NATIONAL RESEARCH TECHNICAL UNIVERSITY NAMED AFTER A. N. TUPOLEV - MASTER, 2012 - 2014
Development and maintenance of a high-quality software product

PERSONAL BRAND

I maintain a technical blog on [Medium](#) and develop my own mobile apps under open-source licenses, including [GrowingUp](#). I served as a judge at the [Los Altos Hacks](#) hackathon event.
